

**Now you can enjoy the delights of real drought beer. These pumps are perfect for parties, picnics, social gatherings and holidays.**

**Pony Pump.** The Pony Pump is a compact air pump that fits any American style single-valve keg. It is the most convenient portable pump system on the market.

- **Stationary Probe:** The probe which opens the keg valves is molded as an integral part of the one-piece pump body. This simplifies the pump and eliminates linkages and other moving parts.
- **“No-spray” Seal:** The Pump body seal makes positive contact with the keg valve body as the probe first touches the valve. The seal is firmly compressed as the probe pushes the valves open. This prevents any “spray” from the pressure in the keg.
- **Pressure Release Vent:** This serves two purposes: First, it eliminates foaming caused by over pumping. Second, it allows the user to safely relieve pressure from the keg before removing the pump.

**Bronco Pump:** A portable party pump system for single valve kegs. This convenient pump system is compact in size and comes complete with a sturdy metal tapping base, high volume air pump, beer tubing and faucet.

- **Pressure Release Vent:** This serves two purposes. First, it eliminates foaming caused by over pumping. Second, it allows the user to safely relieve pressure from the keg before removing the pump.
- **Easy Cleaning:** The pump can be quickly disassembled for cleaning. The pump body, tubing, and faucet can be immersed and rinsed in plain tap water.

# MORE PARTY PUMPS

## Maverick:

- Anytime, Anywhere: Once the Maverick Pump is installed you are ready to pour the first beer...
- Don't Pump: Open the faucet (quickly and all the way) and allow the beer to flow. You may find at first the flow of beer is faster than desired. This normal and due to the CO2 pressure in the ball.
- Don't Over pump: Only pump when the beer flows begins to slow. The number one problem once a ball is tapped is OVERPUMPING or NO PUMPING. Both cause problems.

## Bronco Pump Multi-Tap

- Durable Injection Molded Plastic
- Fully Assembled
- Increase your beer flow from the keg up to 300%
- American Sankey (Coors, Miller, Bud, Labatt, and most Craft Beers)
- European Sankey (Heineken, Amstel, St. Pauligirl, and more)
- Serves up to 4 beers out of one keg at the same time

**Important Note:** It is necessary to keep your beer refrigerated. When using ice, fill carton at least three-quarters full.

**Keg Party Pumps are the most commonly used method to dispense draft keg beer at parties.**

### Super Pumps

A rugged, durable picnic pump assures top tap performance!

- Keg pump taps easily in one motion
- Probe returns to the untapped position automatically
- Manual keg vent allows correction of pressure conditions that may cause foaming
- Plastic self-closing faucet-and-hose assembly rotates 360° without disconnecting keg pump from barrel
- Probe seal prevents air and beer from mixing – a problem that could cause foaming
- Easy to maintain – cleaning cup and instructions are included
- Each keg pump is individually packaged in an eye-catching carton, including easy-to-follow tapping instructions – ideal for retail sales display
